

ERSKINE HOSPITAL ASSISTED LIVING ACCOMMODATION

Allan & Hanel were employed to provide Project Management, Quantity Surveying and Principal Designer Services for the formation of five one bedroom assisted living flats within the existing Erskine Hospital estate.

The new build extension also included two accessible units. The works took place within a live care facility, therefore careful consideration to access routes for existing residents was required, ensuring continuity of services throughout.

Contract Value: £700,000

Client: Erskine Hospital

Consultants: Mast Architects, Struer Consulting Engineers and Hulley and Kirkwood Consulting Engineers
